

# Etac Prio

CARING COMFORT IN EVERY DETAIL

 **etac**<sup>®</sup>

Creating Possibilities

# Etac Prio

– caring comfort  
in every detail

*Great features:*

- ✓ Dynamic Head Support
- ✓ Comfort Tilt Lock
- ✓ Dynamic Pelvic Support

# Benefits for the user

## SEATING COMFORT

- **Dynamic head support**  
The support automatically shifts position between reclined and upright position, so the support doesn't push the user's head forward when sitting up.
- **Dynamic pelvic support**  
The unique pelvic strap adjustment gives a stable, comfortable and proper support when sitting up. The pelvic strap automatically loosens in a reclined position.

## MOBILITY

- **Improved mobility**  
Several options for wheel size and positioning make Etac Prio extremely well balanced, which facilitates the user's own propelling of the chair.

## SAFETY

- **Stable and safe**  
The unique seat comfort, combined with the neat but robust design, ensures a stable position that makes Etac Prio a long-term "partner" retaining its safety and benefits for many years.

Benefits for the user

# Benefits for the caregiver

## HANDLING

### ● Easy to tilt

It is possible to tilt the wheelchair while standing beside the chair and having eye contact with the user. The Comfort Tilt Lock also guides to a comfortable and correct position, so that you don't risk the user being positioned too far forward.

### ● Light and compact – easy to manoeuvre

Etac Prio is easy to lift and transport, push and turn, even in when reclined and in small spaces. Tilting also demands very little effort. This reduces the strain and overall workload for the caregiver.

## INNOVATION

### ● Easy to make the user comfortable

Through the dynamic head support, the caregiver doesn't need to adjust the head support every time the user changes between sitting and leaning/lying down, or add an extra pillow.

## ADJUSTMENTS

### ● Easy to adjust

Many options and smooth, intuitive adjustments make it easy to adjust the wheelchair according to the user's size and need.

More benefits for the caregiver

# You can always make things a little bit better. And sometimes a lot.

For people who depend on both wheelchair and assistance, the word “care” means a lot more than having your basic needs fulfilled. It’s about making everyday life as easy and comfortable as possible.

*For the user, but also for the caregiver and family members.*

This was our focus when we designed Etac Prio, with several new, unique innovations. We also improved many of the standard functions. In short, we designed it like every Etac product – with help from users and professionals, and with dedicated care for every detail.

*Love possibilities*

*Love life!*

*Love comfort*

# 40 years

## **OF STANDARD-SETTING INNOVATIONS**

Swedish design and quality, with comfort and improvement in the front seat.

Since 1973 Etac has developed and manufactured products improving the everyday life for people with impairments, and since 1981 we have also developed wheelchairs, with several innovations that have set new standards in the market. Our focus on improvement, together with robust design and quality, has become Etac's hallmark. Our track excellent record in functional, innovative and comfortable products includes a number of Swedish and international design awards.
